

Burs Cutter Carbide

1/2 Shank Cutter Burs

1/2 BUR CUTTER - KEYSTONE

CARBIDE BUR - KEYSTONE

Features

- * Fast material removal
- * Smooth cutting action
- * Reduced vibration
- * Minimum heat build up
- * Long tool life
- * Minimal clogging
- * Maximum toll control

Burs Cutter Carbide

1/4 Shank Cutter Burs

1/4 BUR CUTTER SPIRAL CUT - KEYSTONE

SPIRAL CUT KEYSTONE CARBIDE BURS - KEYSTONE

These Spiral Cut Keystone Carbide Burs require less pressure and cut smooth with minimum heat. They are hand ground to insure quality control. We offer a wide list of bur styles and sizes. Sold individually.

Features

- * Fast material removal
- * Smooth cutting action
- * Reduced vibration
- * Minimum heat build up
- * Long tool life
- * Minimal clogging
- * Maximum toll control

On a single cut bur all the flutes spiral in the same direction, generally this configuration produces less aggressive cutting action and leaves a smoother finish

ROBOT CARBIDE HP CUTTERS - SHOFU

ROBOT CARBIDE HP CUTTERS - SHOFU

With a special cross-cut, these Robot Carbide cutters are suitable for virtually all dental materials.

The 18 shapes and sizes of Robot Carbide cutters match a wide range of materials and uses.

Indication

Precutting, cutting, shaping, contouring

Range of application

Suitable for the following materials:

Model casting alloys, chrome-cobalt, precious metal, reduced precious metal, precious metal-free alloys, non-precious metals, plaster, denture acrylics, tray materials, and base-plate materials

Benefits:

- * Supporting cutter geometry helps to prolong the life of the working end
- * 18 different shapes and sizes
- * Good cutting capacity
- * Precison running
- * No fracturing blades
- * Economical

Material properties

Working end

- * Working end of isostatically condensed tungsten carbide
- * Universal cross-cut
- * Working end and shank are welded

Shapes and sizes

18 shapes and designs - see shape overview

Shank

Stainless steel shank

Shank shape

HP = Straight Handpiece

Recommended speed range

10,000 - 15,000 min-1

The recommended speed range varies according to the type of shank and the shape and size of the working end. The maximum permitted speed should not be exceeded

US DENTAL DEPOT Inc is an Authorized SHOFU Dealer in the Us.

Burs Cutter Carbide

3/32 Burs Diamond Cut

47 BUR - DIAMOND CUT - SHARK

47 BUR - DIAMOND CUT - SHARK

Diamond cut carbide burs are typically used for steel or cast iron where extremely aggressive cutting action is required. Deep cross-cut pattern is excellent in tire applications as well as many other uses when cutting extremely hard metals, etc.
