**SOLIDILITE LIGHT CURING UNIT
S | SHOFU**

SOLIDILITE LIGHT CURING UNITS - SHOFU

The newly developed Solidilite V & Sublite V light polymerization units will impress you with the help of their state of the art technology. You will appreciate their compact construction and appealing design.

They are designed to optimally polymerize the ceramic filled micro hybrid composites Ceramage and Solidex, and boost the efficiency of the working process when used either separately or in combination.

LC Curing Units - DENTAL FARM

DENTAL FARM A5407V PHOTOPOL PRO VACUUM UV LIGHT-CURING UNIT FOR COMPOSITES

Photopol PRO is a multi-purpose light-curing furnace which best suits with most composites sensitive to UV light. Three extremely powerful circuits 8 LED UV at different frequency assure the overall radiation. The distinctive feature of each individual LED is a specific collimation lens focusing the light (therefore the emitted power) in a very restricted angle of incidence. Both the working chamber and the horizontal plane are coated with highly reflecting material assuring a mirror effect with no dispersion of ultraviolet rays. The support plate is steadily rotating and it has been conveniently assembled on a sliding drawer allowing to position and to pick up easily the elements to be treated.

CHARACTERISTICS

- Two circuits 8 LED each covering the higher UV spectrum (above 410nm blue)
- One circuit 8 LED covering the lower UV spectrum (under 410nm violet)
- Possibility of combined action of two UV light sources
- 24 high power LED featuring a specific collimation lens which concentrates the light for deep penetration in the material
- Ability to adjust the power or to measure it out to avoid any shock to the material
- Wide range of the operating spectrum (from 320 to 550 nanometers, peak at 470 nm)
- Ideally suited to light-cure any composite available in the dental field, even those requiring treatment under vacuum
- Rotating turntable working under continuous cycle to assure the all-over exposure of the elements restricting the shade effect
- Transparent polycarbonate bell-jar and built-in vacuum pump
- Modern user interface with colour-touch display
- Extended range of working parameters allowing to preset the most correct cycle to cover any requirement and to store the preset programs
- Useful pre-polymerization function to dry out and fix the different layers (operation lasting few seconds, repeated in steady succession)

- Overall dimensions: mm 280x350x300h

Curing Units

Pressure Pot 2 Gal

Pressure Pot 6qts - CFS

CFS - Pressure Pot 6QT - 110v

Pressure Post

Mfg # 280-106

This Pneumatic Heat Regulated Pressure Pot is safe and easy to use for curing a wide variety of acrylics under controlled heat and pressure. Constructed of both stainless steel and aluminum, the curing vessel features easy-to-read, built-in dual gauges to provide accurate readouts for both pressure and internal temperature of the pot, an adjustable temperature control, and a pressure safety release. Its solid clad bottom provides even heat distribution.

Features:

- * 6-quart capacity (3 pour flasks)
- * Quick connect airline connector
- * Countertop design
- * 120 volt
- * Variable temperature control
- * Variable pressure control
- * Limited 1-year warranty

Size: Shipping size 18x12x14

Weight: 10lb

Curing Units

Washout only units

WASHOUT UNIT ONLY - HANDLER

WASHOUT UNIT ONLY SINGLE 1 TANK - GAS - HANDLER

This unit (alone) does not include the CABINET Heavy gauge stainless steel for durability & functionality, Sinks built into stainless steel top with seamless design, Marine Edging keeps water from running off work surface, built by Handler in the U.S.A.

Descriptions:

- * Single tank
- * Built in 18guage stainless steel
- * Pump to recirculate water and wax filter
- * Gas

Weight & Dimensions:

- * Shipping Weight.: 350 lbs [158.8 Kg]
- * Unit Dimensions: 18in wide x 14in depth x 12in deep- [45cm x 35cm x 30cm]
