HOTTY - WAX COPINGS - RENFERT

HOTTY - WAX COPINGS - RENFERT

Function & Performance

The wax dipping pots hotty and hotty LED are the optimal units for producing dimensionally stable wax copings with a uniform thickness in only a few seconds.

Advantages

- * Quick, continuous heating phase.
- * Accurate results due to permanent compensation of minimal temperature fluctuations.
- * Uniform temperature distribution ensures consistent layer thickness of the wax copings.

Features

The membrane keypad of the hotty LED enables the temperature to be set accurately to within a degree. The temperature status is permanently indicated by the LED display.

The hotty allows for temperature input and display via a potentiometer.

Details

- * Actual value indication in the dipping area of the dies.

- * Infinitely variable temperature setting from 60 - 110C (140 - 230F).
- * Ergonomically contoured housing provides optimal support for the fingers.
- * No contamination of the unit by wax residue thanks to the specially designed wax runback pot.
- * The integrated lid provides protection against dirt and dust.

THE HEAT ZONE - WHIP MIX

THE HEAT ZONE - WHIP MIX

The Heat Zone heats wax modeling tools without flame using an electromagnetic induction process and is sensor activated when a tool is inserted into the "zone". It heats the tool safely and extremely fast, replacing the traditional Bunsen Burner. The induction form of heating ensures complete safety for non-metallic items such as fingers and clothing eliminating the potential for burns or fire.

Description:

- * Heats wax tools fast without flame.
- * No carbon deposits on instruments or on wax ups.

- * Energy efficient as power is used only at the moment of heating.
- * No gas lines required, making unit mobile and operational anywhere an electric outlet is available.
- * Indicator light glows green for ready mode and red for when in use.
- * Safety light blinks when instrument is left in too long
- * Replaceable inserts keeps unit clean of wax residue (5 included)
- * Two Year warranty
- * The Heat Zone provides a safe, clean, convenient way to heat wax tools without compromising productivity

VARIO E-WAXER - RENFERT

VARIO E-WAXER - RENFERT

Function & Performance

The Vario E allows you to keep your sculpting wax at the required working temperature. Protect your wax against too high temperatures, your sculpting tips against mechanical loading and your wax pattern against high stresses.

Advantages

- * 30% saving in time due to the preheating function.
- * Multi-functionality provided by three wax pots with separate control.
- * Individual setting of the wax consistency (from creamy to fluid) using infinitely variable temperature setting of 45 - 110C (113 - 230F).

Details

- * The permanent temperature control of the actual value input is indicated by the LED display.
- * Also suitable for processing light-curing waxes.
- * Ergonomic working height ensures relaxed working.
- * The deep wax pot is ideal for dipping copings.

WAXPROFI - RENFERT
WAXPROFI - RENFERT

Function & Performance

Your individual skill is required to give a denture freshness and vitality. Our Waxprofi is required to implement this efficiently. Enjoy the pleasure of how easy setting-up has become.

Advantages

- * 50% time saving due to the preheating function.
- * Individual setting of the wax consistency (from creamy to fluid) by infinitely variable temperature setting from 40 - 110C (104 - 230F).
- * Work without continually refilling due to a large volume pot (120 ml / 4.08 fl.oz.).

Details

- * Ergonomic height ensures easy uptake of wax portions.
- * Clean handling due to functional pot design.
- * Integrated lid protects the wax.
- * Suitable for the use of light-curing waxes.
