## Acrylic Instruments

### ERGO ACRYL INSTRUMENT - RENFE RT

#### ERGO ACRYL INSTRUMENT - RENFERT

#### Function & Performance

Double-sided modelling instruments ideal for acrylic facings.

#### Advantages

- \* Three individual flexible blades, 0.2 mm thick.
- \* Flexible blades are secured to the instrument handle by a threaded connection and can be easily exchanged, as required.
- \* Ideal for applying and modelling modern facing acrylics.

**METAL-TIPS Composite | ADS**

**METAL-TIPS COMPOSITE - ADS**

- \* Specially designed for sticky composite resins, acrylics, epoxies, sealants, lubricants, and waxes.
- \* Non-stick Flexi-Tips have a true non-stick surface, flexible enough to produce fluid shapes but firm enough to compact and condense viscous composite material.
- \* Solid, flexible silicone tip.
- \* 5 unique tip shapes: Materials can be picked-up, applied, condensed, carved, blended, smoothed and textured, effortlessly.
- \* Angel Chisel- for applying stains & internal stria.
- \* Flat Chisel- for bending layers & shaping surfaces
- \* Cup Chisel- for modeling occlusal surfaces
- \* Cup Round- for modeling cervical areas
- \* Taper Point- ideal for occlusal shaping
- \* Flexi-Tips allows each layer of composite material to

be firmly compacted and smoothed into the previous layer.

- \* Easily polish and create a beautiful, dense restoration with no visible joints or voids.
- \* Flexi-Tips have been evaluated and approved by the leading manufacturers of composite restorative materials.
- \* Stiffer and more durable than brushes.
- \* Faster and easier than rigid instruments.

## Plaster & Alginate Mix Spatulas

### PLASTER SPATULA WITH WOOD HANDLER - ECCO

#### SPATULA WITH WOOD HANDLER - ECCO

**Features:**

This line of spatulas was designed by dental engineers for better manipulation of alginate and plaster.

Heavy Blade Spatula are the most advanced technical design. They help to mix and become

a scoop which is a great help in picking up additional material.

### DUST BRUSHES - SMILE LINE

DUST BRUSHES - SMILE LINE

**Features:**

In extension to the black anodized aluminum handles and to the carbon fiber handles, Smile Line proposes an assortment of wooden handles. A choice of three different species is available while three different shapes/sizes are possible. The handles are of course all compatible with the whole program of tools. The violett wood provides a remarkable contrast in the veins. It is hand polished for a fantastic surface finish.

Palissander's color is warm brown, with tones playing between caramel and cinnamon. The soft, mat finish provides a beautiful silky touch. Ebony of Mozambique is a very dark and deep brown wood, often almost black. Just as violet wood, it is hand polished for a smooth surface finish.

Code	Name	Price	+

### FLEXMOUNT SET - SMILE LINE

#### FLEXMOUNT INSTRUMENT & BRUSHES - SMILE LINE

**Simple - As the Great Ideas**

Smile Line introduces FlexMount, a flexible rubber connector for combining the handle and the tool. This new concept is adapted to Instrument by Smile Line, more specifically to our ZR mixing spatula and our Porcelain Brushes.

**Use & Advice**

The idea is not to snap the brush immediately when taking it out of the water cup. This creates water spattering around the working space (not very comfortable) plus this method doesn't allow the best humidity control in the brush tip. Smile Line's proposal is to first stop the brush on

the H2O sponge for extracting the excess of moisture in the brush tip. Then, only during porcelain build up we are gently snapping, for example between two pick-ups of porcelain. Utilizing this method, your brush tip is automatically receiving the ideal moisture plus is returning to its sharpest shape.

**FlexMount is compatible with the following products:**

- \* Smile Line's ZR spatula
- \* Smile Line's Kolinsky brush tips #8-R, #8-LT, #6
- \* Smile Line's N.era 8 brush tip

**TOOLS AND ACCESSORIES**

**TOOLS AND ACCESSORIES - MPF Brush Co**

The MPF take pride in creating meticulously designed, highly functional, attractive dental instruments.

Although the manufacturing process of dental ceramics has remained relatively unchanged throughout the years, the tools technicians use to create ceramic restorations are continuously evolving.

Utilising materials such as aluminum, resin and carbon fiber has resulted in an impressive, functional product offering at an affordable price.

"Dental laboratory hand tools made by technicians, for technicians."
