TOP SPIN DRILLING MACHINE RENFERT - TOP SPIN DRILLING MACHINES

Experience precision

Function & Performance

The Top spin provides the advantages of precision, reliability and durability. We have been successful in greatly increasing the previous level of quality. You will be fascinated by the unique concentricity, special drill technology and unparalleled dust protection.

Advantages

- * Unique shaft bearing technology ensures a drilling accuracy of ? 0.01mm.
- * Powerful motor without losing performance during drilling 8,000 rpm.
- * Unique drill technology enables extremely easy drilling without resistance.

LASER PINSETTER - ECCO

LASER PINSETTER - ECCO

Feature

Laser pinsetter unit like Top Spin or Giroform
Idem Pindex kit and similar Renfert Top Spin Pindex

Technical Specifications:

- * Laser Light beam indicator for accurate pin location
- * High Speed motor
- * Adj. Depth Drilling
- * Uses the regular standard Pindex drills
- * Counter sunk P" type drill - Standard Pindex drill bur - 1/8 Id Chuck
- * All Metal construction
- * Sealed Housing

AUTO SPIN ACCESSORIES - RENFERT

AUTO SPIN ACCESSORIES - RENFERT

Features:

Using the AUTO spin pin drill, precise working models with plastic base plates can be fabricated. The drilling unit is also compatible with other model-making systems like Giroform or Zeiser.

When uniquely combined with the perfectly matched materials of the AUTO spin model-making system, even the most sophisticated model fabrication is turned into child's play.

GIROFORM SYSTEM PARTS - AMANN GIRRBACH

giroformFabricate precision models easily and quicklyThe pin drill allows precise, fast and safe determination of the desired drill position. Drilling starts at the press of a button. The plate holder is fastened magnetically, securing the drill position.

In order to guarantee pin friction, identical, smoothfaced and regular holes are drilled into the giroform base plate. The precise drill guide also enables uniform drilling depth. These specific characteristics of the Giroform pin drill guarantee precise, fast and cost-effective model manufacture.
