LAY:ART - WET MIXING TRAYS - RENFERT

LAY:ART - WET MIXING TRAYS - RENFERT

Function & Performance

Glazed ceramic tray for preparing and storing stains.

Advantages

- * Balanced distribution of 13 drop-shaped, 2 large and 4 small round mixing wells as well as a smooth mixing surface.
- * Newly developed drop shape: sharp-edged at the back for wiping the brush, tapering at the front to allow controlled dispensing of the stain on the brush surface.

Always individual, always perfect

We have developed this ergonomic system in close collaboration with numerous experts from the porcelain sector: for more efficiency, reliability and pleasure while building up porcelain.

Housing

- * 270° accessibility of all materials using ergonomic wrist support.
- * The well-designed housing lid protects against drying out and contamination, provides an optimal view of the labeling foil and is easily removable.
- * The ingenious ventilation system inhibits mould forming and ensures hygienic working.
- * The large filling opening guarantees comfortable refilling of water without removing the tray.

Foil

The rewritable label in the lid ensures organized management of the porcelains and structured working.

U-MID CLASSIC - SMILE LINE

SMILE LINE - U-MID CLASSIC WET MIXING TRAYS

Since its launch in 1994, U-mid has become worldwide a classic in the segment ? wet trays for porcelain?. Its great and undeniable advantages for everyday techniques are:

automatic wetting of the powders - permanent consistency - no mixing required - time saving and wonderful working conditions - savings in ceramic powders - ergonomics

Pioneers thanks to hi-tech components

The combination of capillary filters offers great reliability. The ceramic porous plate transports moisture from the reservoir to the surface. At the same time the top-layer microporous membrane-filter works as a humidity regulator and

a very smooth working surface. Both components are easy to maintain : the ceramic porous plate can be thoroughly steam cleaned and the microporous membrane-filter can be gently rinsed under running water.

U-mid Classic is available in big format (240x135mm) and in a small format called **Light U-mid** (150x73mm). As an option, Smile Line offers a black microporous membrane-filter to be put over the traditional white membrane.

CAD ARTISTRY PALETTE - MPF Brush Co

CAD ARTISTRY PALETTE - MPF Brush Co

The CAD Artistry Palette was designed with two different options of humidification to keep the proper moisture and proper consistency of ceramic material.

The two platforms on the ceramic tray allow you to choose between humidification with water or with liquid.

Choose between working on a nylon sheet and using the synthetic strips.

Eleven stain compartments act as storage for your favorite stains and colors.

This palette is the perfect solution for ceramists working with CEREC/IN-LAB and CAD-CAM technology.

GLASS CERAMIC PALETTE - MPF Brush Co

GLASS CERAMIC PALETTE - MPF Brus Co

The Glass Ceramic Palette, created for ceramists who prefer a glass working surface, uses a system of synthetic leather strips to keep ceramic mix continuously wet. Water from the base permeates up through the strips and into the ceramic stack, creating a homogenous ceramic mix.

Specifications:

- * Glass work surface.
- * Durable base.
- * Synthetic leather strips keep ceramic mix continuously wet.

MARBLE CERAMIC PALETTE - MPF Brush Co

MARBLE CERAMIC PALETTE - MPF Brush Co

The unique marble used to create this palette allows controlled amounts of water to permeate and wet the nylon worksheet, ensuring a uniform, consistent and workable ceramic mix. The nylon work sheet covering the marble is kinder to Kolinsky brushes and helps keep a finer point for longer periods of time.

Specifications:

- * Italian marble surface with nylon worksheet.
- * Durable base.
- * Capillary action keeps ceramic mix continuously wet.

MOISTURE WET PALETTE - ADS

MOISTURE WET PALETTE - ADS

Moisture Wet Palettes are unique in design. They have unglazed and glazed surfaces. The unglazed surface in the slant areas allow the moisture from the bottom of the tray to keep the porcelain wet. Perfect for mixing and preparing custom porcelain applications in various shades to increase the lifelike appearance of the ceramic crowns. Supplied in custom stay wet plastic cases.

LIQUIDS - CERATEC

LIQUIDS - CERATEC

Modeling Liquid: a special liquid for use with dentine and incisal porcelains to enhance the building and modeling of the ceramic as well as improving the density of the fired restoration.

Stain and Glaze Medium: a special liquid to be used only for the mixing of glaze and stain powders.

Shoulder SET: this liquid is used in the mixing of shoulder powders allowing the shoulder to harden on the die facilitating removal without affecting unsupported porcelain.

Shoulder SEP: a separating medium used over the stone model to prevent adherence of the porcelain to the stone.

Opaque Liquid: a special liquid to be used in the mixing of Opaque powders. When used, this liquid will provide an opaque powder mix that is creamier and easier to apply the metal. Also used for moistening the brush for enhancing the application of paste opaques porcelains.

UNITED COLORS - SMILE LINE

UNITED COLORS - SMILE LINE

Imagined, developed and tested by MDT Dominique Vinci, United Colors of D.Vinci is an assortment of intensive fluo colors for porcelain build-up.

A very small quantity of United Colors added to your porcelain mix will brighten it with the selected color.

When choosing a different color for each of the mass used, you'll have an extremely precise and detailed perception of your build-up.

Thanks to the plasticity of the product, you won't see the different colors mixing to each other.

United Colors of D.Vinci fire without leaving residues. It is important to extend the pre-drying time of the porcelain.

Available Color: Blue- Green- Orange- Pink- Purple- Red- Yellow

STAIN & PASTE OPAQUE PALETTE E - MPF Brush Co

STAIN & PASTE OPAQUE PALETTE - MPF Brush Co

The unique, angled, step-type design of the Stain & Paste Opaque Palette allows easy access to materials. Reservoirs have a very unique design, elongated towards the rear so that material flows to the back of the cup, preventing spillage. The tight seal lid prevents oxygen drying out materials. A color chart helps keep material colors in order.

Specifications:

- * Smart storage solution for stain and paste opaque materials.
- * Durable plastic structure.
- * Tight seal lid.
