2-TANKS Sandblasters - RENFERT

2 Tanks Sandblasters - RENFERT

BASIC CLASSIC - 2-TANKS - RENFERT

BASIC CLASSIC - TWO TANK - RENFERT

Precision and premium: Highest level technology.

Renfert advantage:

The unique mixing chamber technology, developed in-house, and the special geometry of the IT nozzles provide decisive advantages.

- * Perfectly uniform abrasive flow, abrasive power and jet pattern. This allows you to achieve consistently uniform, reproducible surface conditioning, ensuring perfect bonding properties. No stresses and cracks in the porcelain.
- * Efficient sandblasting reduces abrasive costs by up to 80%, thanks to abrasive flow with optimum air-sand mixture, regardless of the tank level and with minimum to no pre-blasting and post-blasting.
- * Focused, effective and reliable sandblasting. You achieve effective removal from the framework without loss of abrasive due to scatter. At the same time your sensitive frameworks are optimally protected

The PerfectView concept

Renfert advantage:

- * The constant, brightly illuminated blasting chamber (4,800 Lux) guarantees optimum contour and detail recognition on your framework.
- * Thanks to the special daylight LED technology you can see greater contrasts and clearer differences in shade on the illuminated framework.
- * The intelligent ventilation technology optimizes removal of air-/sand-turbulences, so that you always have a clear view of the framework (from Basic master onwards).
- * The silicone coated glass helps to reduce etching and allows a longer viewing life (optional with Basic classic).
- * The color-coded system on the tank lids, tank placement, handpieces and tank selection switch make the unit very easy to operate.
- * The ergonomic hose routing also creates optimum viewing conditions.
- * Insider-Tip! Subject cold siliconizing in the sandblasting unit:
- * 3M Espe recommends exclusive use of the Basic series of Renfert sandblasting units with Rocatec™. Their advantage: Coverage is absolutely uniform using the prescribed impact energy and without thermal loading of the alloy.
- * Large technology in a compact space

Key Functions:

- * Attractive introduction to the Renfert Sandblasting Technology
- * Precise working procedures and great cost efficiency

with the special Renfert mixing chamber.

Innovative PerfectView Concept:

- * Unique LED technology: Optimal contrast of all objects and brightly illuminated blasting chamber
- * Daylight with 4,800 LUX for fatigue free and comfortable working.
- * Maximum range of vision for a perfect view and max. control.

Function & Performance:

Basic classic is the low-priced entry to professional microblasting technology; a compact unit in the basic version with up to 2 tanks.

Advantages

- Precise blasting with the special mixing chamber technology (Venturi principle).
- Can be extended to 2 tanks without the use of tools.
- Efficient working thanks to the tank selection switch inside the sandblasting chamber.

Details

Its slim design ensures that it can be located in the smallest space.

The two abrasive tanks cover the usual requirements in dental technology, e.g. precious metal and ceramic with abrasive from 25-70 µm and 70-250 µm.

Abrasive chamber volume

14 l

Options:

- * 70mic & 250mic - # 2947-4025 new model (previous version was 2947-4026)
- * 250mic & 250mic - # 2947-4250
- * 70mic & 70mic - #2947-4000
- * 70 mic : is for using from 25 to 70 mic Aluminum Oxide
- * 250 mic : is for using from 71 mic to 250 mic aluminum oxide

BASIC MASTER BLASTER - 2-TANKS - RENFERT

BASIC FINE SANDBLASTING UNITS - 2 Tanks

Precision and premium: Highest level technology.

Function & Performance

The Basic master microblaster is a genuine space-saver and provides great freedom of movement. The unit is equipped with 2 tanks.

Advantages

Precise blasting with the special mixing chamber technology (Venturi principle). Large volume blasting chamber provides maximum freedom of movement. Ventilation slots ensure optimal ventilation of the blasting chamber and a clear view (PerfectView-Concept).

Details

The Basic master is preferred by laboratories, which expect a higher workload.

The many extras in terms of ergonomics, ventilation and durability optimise continuous operation of the unit. There are also two abrasive tanks for all the standard requirements in dental technology, e.g. precious metal and ceramic with abrasives from 25-70 µm and 70-250 µm.

Renfert advantage:

The unique mixing chamber technology, developed in-house, and the special geometry of the IT nozzles provide decisive advantages.

- * Perfectly uniform abrasive flow, abrasive power and jet pattern. This allows you to achieve consistently uniform, reproducible surface conditioning, ensuring perfect bonding properties. No stresses and cracks in the porcelain.

QUATTRO BLASTER 2-TANKS - RENFERT

BASIC FINE SANDBLASTING UNITS - BASIC QUATTRO SANDBLASTER - RENFERT

Renfert Advantage

The unique mixing chamber technology, developed in-house, and the special geometry of the IT nozzles provide decisive advantages.

- * Perfectly uniform abrasive flow, abrasive power and jet pattern. This allows you to achieve consistently uniform, reproducible surface conditioning, ensuring perfect bonding properties. No stresses and cracks in the porcelain.
- * Efficient sandblasting reduces abrasive costs by up to 80%, thanks to abrasive flow with optimum air-sand mixture, regardless of the tank level and with minimum to no pre-blasting and post-blasting.
- * Focused, effective and reliable sandblasting. You achieve effective removal from the framework without loss of abrasive due to scatter. At the same time your sensitive frameworks are optimally protected

Key functions

- * Comfortable, flexible, top-class fine sandblasting unit (with up to 4 tanks)
- * Precise working procedures and great cost efficiency with the special mixing chamber
- * Easy tank upgrade, tool-free due to the quick connection and color coded system

The Perfect View Concept

- * Renfert advantage: The constant, brightly illuminated blasting chamber (4,800 Lux) guarantees optimum contour and detail recognition on your framework.
- * Thanks to the special daylight LED technology you can see greater contrasts and clearer differences in shade on the illuminated framework.
- * The intelligent ventilation technology optimizes removal of air-/sand-turbulences, so that you always have a clear view of the framework (from Basic master onwards).
- * The silicone coated glass helps to reduce etching and allows a longer viewing life (optional with Basic classic).
- * The color-coded system on the tank lids, tank placement, handpieces and tank selection switch make the unit very easy to operate.
- * The ergonomic hose routing also creates optimum viewing conditions.

Subject cold siliconizing in the sandblasting unit:

3M Espe recommends exclusive use of the Basic series of Renfert sandblasting units with Rocatec™. Their advantage: Coverage is absolutely uniform using the prescribed impact energy and without thermal loading of the alloy.

Function & Performance

Convenient, flexible premium class microblaster with 2-4 tanks.

Advantages

- * Very easy, toolless tank extension via quick-release coupling and colour-coded system.
- * Precise blasting with the special mixing chamber technology (Venturi principle).
- * Easy hand and framework cleaning using the integrated blow-out nozzle.

Details

Several applications simultaneously

The Basic quattro enables several applications simultaneously in a compact space, e.g. surface conditioning, devesting and preparation of metal frameworks for oxide firing.

Retrofitting

The Basic quattro can be quickly retrofitted in the lab to up to four tanks, with e.g. the following arrangement: 50 ?m Cobra, 50 ?m Rolloblast, 90-125 ?m Cobra and 250 m Cobra.

Abrasive chamber volume

QUATTRO BLASTER

QUATTRO BLASTER

- * The Basic microblasters can carry out all of the conventional applications needed within the field of dental technology. Their modular construction allows the basic 2-tank model to be upgraded to a 3 or 4- tank unit.
- * The colour coding system for the tank lids, tanks, tank selector switch, and blasting handles simplifies selection of the correct combination. An air blast nozzle is located in the interior of the blasting chamber.
- * An easy-to-reach, flat 360 foot switch is enclosed in delivery. An additional protective grate to prevent premature glass wear due to erosion is also optionally available.

QUATTRO BLASTER IS

QUATRO BLASTER IS

- * Same description as the quattro blaster BUT this one has an Immediate Stop/Start.
- * Stop happens within a fraction of a second.
- * The Basic quattro IS is a specialised version of the Basic quattro. IS (= immediate stop) stands for the integrated instant cut-off technology. This system allows the blasting start / stop process to occur within a fraction of a second. The modular construction allows expansion of the 2-tank basic unit to one with 3 or 4 tanks.
- * The colour coding system for the tank lids, tanks, tank selector switch, and blasting handles simplifies selection of the correct combination. An air blast nozzle is also located in the interior of the blasting chamber.

2-TANKS Sandblasters - VANIMAN

2 Tanks Sandblasters - VANIMAN

SANDSTORM EDGE - 2-TANKS - VANIMAN

SANDSTORM EDGE - TWO TANKS - VANIMAN

A space-saving micro abrasive sand blaster specifically designed for the dental industry. These units are capable of handling all dental lab and dental office applications with ease and precision. Staying true to Vaniman's world-renowned blasting system, the SandStorm Edge delivers consistent and unmatched media flow throughout the life of the unit. Sleek design and low cost of ownership makes this unit a must have for any dental professional. These products are manufactured in the USA.

Specifications:

- * Extra-large tanks - Labor saving Easy Fill sand tanks hold up to 4 pounds of media
- * LED Lighting
- * Exclusive non-clogging flow design - internal automatic air/media purging system
- * Blast proof resin cabinet is maintenance free
- * Includes 2 Sapphire Crystal Embedded Tips
- * Foot pedal control
- * Adjustable Air Pressure
- * Two hand pieces
- * 3 Year Warranty
- * Should be paired with a dust collector

DUSTEX MASTER PLUS - RENFERT

DUSTEX MASTER PLUS - RENFERT

At The Restoration.

The tilt and slip resistant Dustex master plus protects the technician from splinters, dust and vapors. The sophisticated, ergonomic design and the armrests provide a comfortable working posture for fatigue-free work.

Compact and yet spacious

The large arm inlets, the spacious inner volume and the easy-to-open glass pane all contribute to providing extensive freedom of movement for efficient work. Time consuming clean-up of the workbench is eliminated. The compact dimensions and low weight allow the inexpensive dust box to be flexibly employed.

Technical Details:

- * Built-in, bright illumination:
- * 2400 lux (compared with standard office lighting at approx. 500 lux).
- * Laminated glass protective pane with silicone coating (replaceable).

US DENTAL DEPOT is an Authorized Renfert Dealer in US.

IT BLASTING NOZZLE - RENFERT

IT BLASTING NOZZLE - RENFERT

Function & Performance

The quality and speed for sandblasting castings depend on the combination of abrasive agent and sandblasting nozzle as well as on use of the optimum sandblasting technique.

Advantages

- * Service life of nozzles four times longer than that of standard nozzles, as they are made of a highly resistant high-tech material.
- * Excellent control and focusing of the abrasive agent due to the extended shape of the nozzle.
- * Optimum sandblasting nozzles for all applications.
