Adapta system

ADAPTA DEEP-DRAWING SYSTEM - BEGO

ADAPTA DEEP-DRAWING SYSTEM - BEGO

- * Simple and fast deep-drawing of copings
- * Reasonably priced system which has been proven over many years with special plastic foils
- * A uniform minimum wall thickness ensures a high level of stability in the copings
- * Ideal for the double-crown technique; coated with milling wax, the Adapta coping offers a high level of protection against inadvertent milling through
- * The thin 0.1 mm spacer foil, which is used as part of the system, frees up the necessary, defined space for the luting material

THOWAX SCULPTURING WAX - 70

gr YETI

THOWAX SCULPTURING WAX YETI

THOWAX is a sculpturing wax suitable for the crown, bridge and inlay technique. It is a compound of natural waxes free from any synthetic materials. Thanks to its great sculpturing features THOWAX has gained an excellent reputation worldwide.

- * excellent sculpturing characteristics due to ingredients with extremely short molecules
- * allows a drawing of the wax and the sculpturing of even smallest details
- * quick cooling down facilitates rapid working
- * excellent sculpturing characteristics without filling up the fissures
- * opaque even when molten in order to have a better control during waxing-up
- * high molecular density - easily carvable, leaves smooth surfaces
- * matches perfectly with our special and dipping waxes
- * free from synthetic materials
- * available in 70 g tins, some colours also as wax chip

WAX GIANT - MODELLING WAX - YETI

WAX GIANT - MODELLING WAX - YETI

Wax Giant Double Line:

- * Double Line with integrated cervical wax inlay
- * Quick and time-saving
- * Ergonomical working height
- * Two foam rings for convenient removing
- * Firm base for stability
- * Transparent dust protection cover

Wax Giant Single Line:

- * Enables modelling of smallest fissures - natural looking occlusion
- * Allows drawing of the wax
- * Best stability in melted condition - easier building up of tooth shapes

Wax Giant by Jochen Peters:

Jochen Peters shows in his special wax-up technique how it is possible to create highclass functional occlusal surfaces in a minimum of time following his efficient, systematic and easy-to-do working steps. Since in the concept by Jochen Peters build up and scrape down of the wax are combined, a wax which meets both criteria in a perfect way was required. Thanks to a good cooperation both the sculptural waxes ?Sahara? and ?Sunlight? as well as the suitable cervical wax ?Wood? were created.

WAXES - YETI

WAXES - YETI

- * Yeti Wax is especially used within the casting technique but also suitable for the waxing up technique.
- * It has good connecting wax, melting point 60F and suitable for crowns and bridges.
- * It cools down slower than Thowax or IQ wax.
- * The softer wax is ideal to transfer the occlusal wax from the master model to the duplicate.
- * Has the same excellent scraping characteristics as Thowax and IQ wax.

CASTING WAXES - WHIP MIX

CASTING WAXES - WHIP MIX

Whip Mix inlay waxes are compounded for use in the production of the finest inlays. They may be flowed in the liquid state, softened over a flame, or in water at 54-60 degrees C (130-140 degrees F) and are easily adaptable to the cavity without crumbling. They maintain an even degrees of workability over a wide temperature range, assuring ease and accuracy of adaption under pressure. Wax additions and corrections may be made with resultant homogeneous bonding. They are particularly outstanding for their excellent carving properties, shave smoothly without shipping or flaking. They conform to F.D.I. Spec. No. 4.

The REGULAR type is especially suited for indirect work at room temperature, or general use in cool weather.

The HARD type has a low flow property and is thus eminently suited for general use in warm weather. The #6 type is similar in flow to the Regular and is physically harder in carving. Bulk packaging is

available in all types and colors.

DOUBLE END PATTERN PAINTERS - WHIP MIX

DOUBLE END PATTERN PAINTERS - WHIP MIX

The highest quality Red Sable hair used as bristle for these brushes provides a soft yet resilient brush that does not mat or become limp when wet. The specially contoured handles proved a comfortable and secure grip. Their long life makes them a most economical brush to use.

Small

One end has hairs 5/8" long, while the other end has a small cluster 3/8" long. An excellent applicator of mixed investment to patterns, it is also the ideal brush for applying die lubricants, surface tension reducers (debubbler), and tinfoil substitutes. It is equally effective as an applicator for porcelain and plastic used in crown and bridge work and the stains used with these materials.

Large

One end has hairs 5/8" long. The other end contains a still larger cluster of 1" long, stiffer white bristles. Both ends are used in applying investment materials, especially to the gingival and interproximal areas, when flasking full and partial dentures.

CROWAX & CROWAX DUR - RENFERT

CROWAX & CROWAX DUR - RENFERT

Universal Waxes For:

- * C&B techniques
- * Individual crowns
- * Inlays
- * Bridges
- * Porcelain pressing
- * Wax-ups
- * Model casting techniques

Crowax:

- * Suitable for flame technique as well as electronic waxing-up.
- * Available in green, blue, red, beige and grey.
- * Crowax beige is also suitable for wax-ups.

Crowax Dur:

- * Harder version with a higher melting and drip point.
- * Ideal for use in summer/higher temperature surroundings.
- * Ideally suited for modelling occlusal surfaces.
- * Optimum carving properties.
- * Transparent wax for full porcelain work.

Highest precision with lowest shrinkage values !

In comparison to other waxes the shrinkage values of Crowax and Crowax Dur are considerably lower. This makes the wax particularly suitable for precision work in partial crown, onlay and inlay techniques. Owing to its low contraction Crowax has been valued for many years for long-span bridge work.

US DENTAL DEPOT is an Authorized RENFERT Dealer in US.

GATOR DIP AND BUILD-UP WAXES - WHIP MIX

GATOR DIP AND BUILD-UP WAXES - WHIP MIX

GATOR WAXES are tough and durable, yet incredibly carveable. They don't shrink towards bulk - so they won't pull away from the sides of the die. Once they're applied, low surface tension helps them adhere to all surfaces, producing a seamless, gapless fit. And because of their minimal shrinkage and distortion, you can wax cases today, then invest them at your convenience.

Because they are from the same family, yellow DIP WAX and blue BUILD-UP WAX can be used separately or blended together to create a green wax that is both tough and carveable and useful in many applications.

GEO EXPERT GINGIVA A BURGUERA - RENFERT

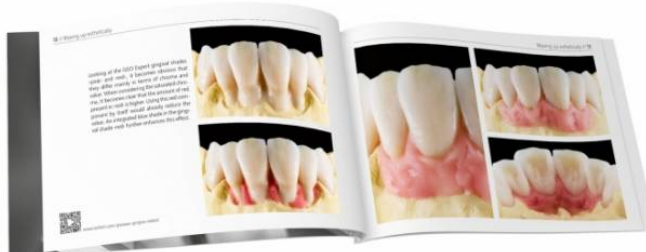

GEO EXPERT GINGIVA A BURGUERA - RENFERT

GEO Expert Gingiva waxes in pink and red are suitable for creating a gingival wax-up in the anterior and posterior region, especially for implant superstructures.

With the help of a manual according to August Bruguera's philosophy, different gingiva colored, monolithic and esthetic wax-ups can be fabricated in a simple and realistic way.

Advantages.

- * Red and white esthetics are possible through two transparent and natural-looking pink and red gingiva modeling waxes
- * Easy fabrication of monolithic and esthetic wax-ups with the help of a guide according to August Bruguera's philosophy
- * Perfect in combination with the esthetic, tooth-colored modeling waxes from the GEO Expert Wax Set A. Bruguera

SMOOTH CASTING WAX - BEGO

SMOOTH CASTING WAX - BEGO

Smooth casting wax is supplied in thicknesses ranging from 0.30mm to 0.50 mm.

It is very pliable and provides excellent transparency to the model surface. The sheet size is 17.5 x 8 cm.

Smooth casting wax is used to vary thickness in combination with stippled surfaces, or when the clinical indication so requires.

US DENTAL DEPOT Inc is an Authorized BEGO Dealer in the US.

Diagnostic Color Sets

CREATION WAX - YETI

CREATION SET Waxes in 12 different colours to learn the labour-intensive layering technique while creating a dental crowns in ceramic. The colour selection of this set allows to create a natural looking saturation in wax for both, dentist and patient. The elevated melting point qualifies these waxes for diagnostic use, the modellation can be

done in the patient's mouth to check shape and colour.

GEO - TOOTH COLOR DIAGNOSTIC WAXES - RENFERT

GEO WAXES - RENFERT

Function & Performance

There are special requirements when using the electrical wax up method. These are fulfilled by GEO Avantgarde waxes. The ideal modeling characteristics are maintained and provide precise results.

Advantages

* Owing to their different qualities GEO Avantgarde modelling waxes cover both sets of requirements.

Key functions

- * Ideally suited for gentle processing with electric wax-up units
- * The high degree of opacity means max. contour definition and control

US DENTAL DEPOT is an Authorized RENFERT Dealer in US.

Classic Modelling

Features

- * Special wax for use with the Bunsen burner
- * Their excellence lies in the optimum properties of raw material used.
- * Behaves in a plastic manner to accentuate the relief.

Key functions

- * Wax characteristics are optimally suited to working with the Bunsen flame
- * The wide melting interval range allows quick application and stress-free cooling
- * Very low shrinkage means high fitting accuracy and precision

LIFE LIKE PRESENTATION WAX - WHIP MIX

LIFE LIKE PRESENTATION WAX - WHIP MIX

A white enamel-like wax that makes a more aesthetic case presentation. The hardness of Life-Like Presentation Wax assures easy carving properties and additions can be made with perfect blending. Its opacity is sufficient to hide colored die stones even with thin laminate veneer waxups. The Life-Like Presentation Wax wax-up also aids in the fabrication of temporaries.

Every case presentation with Life-Like reflects the quality, skill and attention to aesthetics the clinician's practice is built on.

- * Non-abrasive
- * Easily adjustable
- * No injection machines or hand-held injectors required
- * Perfect for new partial dentures, as well as repairs and replacing metal clasps

Use Itsoclear clasps for:

Repairs, acrylic partials, cast partials with clear clasps in less than 3 minutes, Replace metal clasps on existing partials, Acrylic Nesbit with clear clasps.

Additional benefits:

- * Difference in thickness is .4mm
- * The thicker clasps are a little less flexible and that is why it is ideal to use on molar teeth.
- * If the clasp is handled properly, it will not break.
- * Itsoclear is flexible, doesn't crease or break if used properly. If you take the clasp and bend it, you will not see a white line in the clasp.
- * Adjustable with warm pliers.
- * Easy to work with, dentists can make

adjustments chairside

* Tooth bearing, not tissue bearing

GEO PONTICS - RENFERT

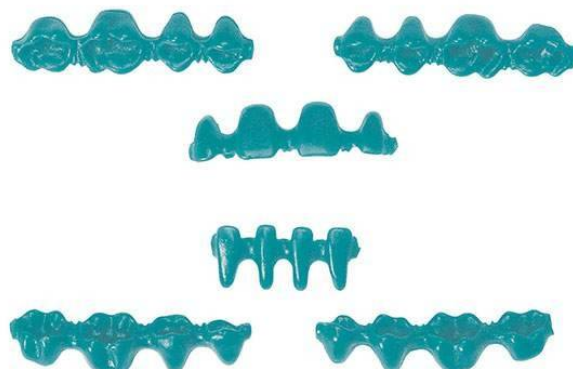

GEO PONTICS - RENFERT

Function & Performance

A set of pontics for modeling anterior and posterior bridges for veneer technique with acrylic or porcelain.

Advantages

- * Universal sizes compatible for all applications - time saving!
- * No distortion during removal due to the high stability.
- * Tooth shapes are proportionally reduced.

WAX PROFILE - BEGO

Wax profiles ? Tried and tested wax profile shapes make for easy, customised wax-up for a wide range of indications in dental technology

? BEGO wax profiles are very easy to mould, do not bend up and can be easily fixed to the investment model ? The wax formula is designed to provide high internal stability and thus offers remarkable protection against inadvertent deformation and constriction during shaping

WAX SPRUE WITH RESERVOIR - 50 GR - CORNING

WAX SPRUE WITH RESERVOIR - 50 GR - CORNING

Used in spruing and mounting patterns. this wax is designed to melt at a lower temperature, thus allowing efficient elimination of pattern waxes from the mold during burnout.

Descriptions:

- * Flexible, yet sufficiently rigid for spruing and mounting the pattern
- * Malleable
- * Flows well, providing a quick, clean burnout
- * Supplied in gauges of 6,8,10, and 12

STICKY WAXES - WHIP MIX

STICKY WAXES - WHIP MIX

Pliable Sticky Wax (Light Orange)

Its unusual tenacity ensures a positive attachment of patterns to sprue pins. Does not become brittle but retains its "tacky" property throughout a wide range of room temperatures. It has a low ash content, so elimination during burnout is readily achieved.

Regular Sticky Wax (Red)

A superior wax for all usual applications. Rigid at room temperature without being overly brittle. Flushes away cleanly with boiling water.

Wax Removers & Solvents

BOIL OUT SOLUTION - ADS

ADS - BOIL OUT SOLUTION

Features

- * The perfect chemistry to remove wax and wax dyes completely in one step.
- * Saves time & money - lasts longer.
- * Superior concentrate - 2 oz. of Boil Out makes one gallon.
- * Use again & again - does not hydrolyze.
- * Just rinse and the job is done, the wax is gone, the flask is clean.
- * No residue.
- * Wax does not redeposit on your workpieces or pot.
- * Wax is held in suspension in the boil out tank.
- * Will even flush wax from sinks and drains.
- * Non-caustic, non-corrosive, not a solvent.
- * Non-toxic, non-flammable, non-hazardous.
- * Mild to hands, safe for all materials.
- * Does not contain optical brighteners, inorganic extenders or coloring agents which could affect your workpiece and are present in most other cleaning agents and detergents.

FORMULA 21 WAX SOLVENT - ADS

FORMULA 21 WAX SOLVENT - ADS

Features:

- * New kerosene-free blend of wax solvents
- * Removes wax, polishing compounds and die lubricant films from acrylic denture teeth before bonding
- * High flash point
- * Pleasant, mild mint odor
- * Use to polish wax-ups
- * Rinsable with water
- * Particularly gentle to sensitive hands

REMOVE-IT WAX SOLVENT - ADS

REMOVE-IT WAX SOLVENT - ADS

Remove-It smoothly dissolves wax in denture molds. Removes oils and die lubricants. Cleans away grinding residues, polishing compounds and grease on instruments and workpieces. Use for polishing wax-ups to a smooth finish. Less flammable than the usual solvents because of its high flash point. Pleasant to work with. Agreeable citrus aroma. Will not fill the lab with toxic kerosene fumes. Rinses away with water. Safe to use. Harmless to acrylics, sinks, and drains. Water rinsable. Gentle to hands. Does not contain chlorinated solvents.

Wire Waxes

KEYWAX WIRE WAX - KEYSTONE

KEYWAX WIRE WAX - KEYSTONE

The best wax money can buy.
The wax is extruded to a uniform diameter and provides the proper tackiness and adhesion.

Forms Available: Round & Half Round

Comes in various gauges

Half Round:

- * 6 Gauges (4.12mm)
- * 8 Gauges (3.26mm)
- * 10 Gauges (2.59mm)
- * 12 Gauges (2.05mm)
- * 14 Gauges (1.63mm)

Round:

- * 6 Gauges (4.12mm)
- * 8 Gauges (3.26mm)
- * 10 Gauges (2.59mm)
- * 12 Gauges (2.05mm)
- * 14 Gauges (1.63mm)
- * 16 Gauges (1.29mm)
- * 18 Gauges (1.02mm)
- * 20 Gauges (0.81mm)

Size: 1/2lb. (226 grs)

Hardness:

Medium Hard

You can use only what you need, reducing waste, yet have access to

longer portions if desired.

This wire is spooled for convenience and to protect the wire against damage.

WIRE WAX - (RENFERT)

RENFERT - GEO WAX WIRE

Function & Performance

An optimal wax mixture makes the GEO wax wire tension-free, thus limiting elastic recovery

ADVANTAGES:

- * Easily shaped but dimensionally stable.
- * Suitable for various fitting due to the different diameters and wax strenghts
- * No tangling or fissure buildup when shaping individually.
- * Dimensionally stable patterns.
- * Stress-free working.
- * Easily adaptable, but dimensionally stable.
