## POLA DAY & NIGHT COLLECTION - SDI

### POLA DAY & NIGHT COLLECTION - SDI

#### Features:

Pola Tooth Whitening System is a neutral pH whitening gel with built-in desensitizing properties that inhibit post-operative sensitivity. Potassium nitrate, the key pain-reducing ingredient, penetrates the nerve endings by blocking transmission of sensitive nerve impulses to provide a calming effect

The high viscosity, neutral ph tooth whitening gels ensure the greatest patient comfort in a take home kit. The unique blend of soothers, conditioners and high water content assist in reducing sensitivity

Natural soother and conditioner

The incorporation of special additives minimises plaque formation and enhances remineralisation to further reduce sensitivity. Antibacterial properties help in tooth recovery.

High water content

The high water content of the gel reduces dehydration of the enamel and decreases patient sensitivity.

Treatment Guidelines

- \* poladay 3% 2 or 3 X 30 min/day OR 1 X 60 min/day
- \* poladay 6% 1 or 2 X 30 min/day OR 1 X 45 min/day
- \* polanight 10% 2 hrs to overnight
- \* polanight 16% 90 min to overnight
