### Enamel & Dentine Bonding

#### 5TH GEN - DENTIN ENAMEL BONDING ADHESIVE - PRO-LINE

##### 5th GEN - DENTIN ENAMEL BONDING ADHESIVE - PRO-LINE

5 th Generation Dentin Enamel Bonding Primer/Adhesive  
( NOT self etching )

The adhesive incorporates aspects of primer and bonding resin in a single bottle designed to bond composites and compomers to dentin and enamel as well as treated amalgam, metal and ceramic surfaces.

After etching, penetration and saturation of the dentin and enamel are accomplished in 2 to 3 coats.

#### ONE STEP ADHESIVE 5th Gen

## ENAMEL BONDING 7th Gen - SHOFU

U

### BEAUTIBOND - SHOFU 7th Generation Bonding

New seventh-generation bonding agent has an exclusive chemistry with unique dual adhesive monomers that deliver equal bond strength to enamel and dentin.

**Features:**

- \* Bond strengths comparable to leading multi-component brands
- \* Single coat for shorter working time
- \* Efficient 30 second application
- \* 5um film thickness
- \* HEMA-free
- \* Convenient unit dose, no mixing

### BEAUTIBONDBEAUTIBOND 7.0 7th Gen BEAUTIBOND

### FL BOND II - 6.0 GEN - ADHESIVE - SHOFU FL BOND II - ADHESIVE - SHOFU

#### 6th Generation Bonding

Self-etching, 2 Steps, Dual Cure to enamel and dentin with S-PRG.  
6th Generation Adhesive A self-etching, fluoride releasing bonding system.

- \* S-PRG ( Surface Pre-Reacted Glass Ionomer ) technology that fully reacts with alumina silica glass particles.
- \* High levels of fluoride release and recharge.
- \* Excellent bonding to tooth structure.
- \* Bonds any composite to enamel and dentin for Class I-V and cervical erosions.
- \* Self-etching saves time and reduces post-operative sensitivity.
- \* Total procedure time: 35 seconds.
- \* High level of radiopacit .

**Features:**

The 2-step, self etching, fluoride releasing adhesive system features a unique Primer and Bonding Agent to provide an excellent bond to both enamel and dentin with a secure marginal seal.

**Created for...**

- \* Deep restorations ( in conjunction with aesthetic restorative material ) is recommended for bonding any composite to enamel and dentin for Class I, II, III, IV and V Estorations, including cervical erosions.
- \* Restoration of hypersensitive and exposed root surfaces.

\* Intra oral repair of fractured indirect restorations when used with M.L. Primer ( Metallink Primer ).

## CLEAR SE BONDING - KURARAY

### KURARAY - CLEAR SE BOND

### 5th Generation Bonding

Kuraray, after inventing the self-etching technique with Clearfil Liner Bond 2 in 1993, has surpassed their universally accepted total-etch technology with a new product - a new-generation self-etching primer and bonding system called Clearfil Se Bond. Clearfil Se Bond is a simplified, light-cure bonding system containing a water-based primer. The procedure time with Clearfil Se Bond is significantly reduced, while providing enhanced bond strength and sealing properties -- and, it can be used with all light-cured restoration. The unique "Outer Case" delivery system allows direct finger control of the contents.

### Features & Benefits

- \* Secure, fast and easy to use
- \* One bottle of self-etching primer for effective one-step conditioning of cut enamel and dentin without rinsing
- \* No excessive decalcification
- \* Intraoral repairs of porcelain and composite with additional use of Clearfil

### Porcelain Bond Activator

- \* Effective marginal sealing for protection against micro-leakage
- \* High bond strength to dentin, enamel, metals and porcelain
- \* Indicated for composites, compomer

## DenTASTIC - PULPDENT

### DenTASTIC UNO - One Step Wet Bonding

#### 5th Generation Light Cure

For all direct bonding light cure applications. UNO? is an effective, single-component adhesive for bonding to dentin, enamel, porcelain, metal, composite and other resins.

### DenTASTIC UNO-DUO Simplified Dual Cure Adhesive

#### 5th Generation Dual Cure

DUO is the dual cure catalyst for DenTASTIC? UNO?. Use UNO-DUO? for indirect restorations, core build ups, or whenever self-cure or dual cure capability is indicated. Independent testing shows excellent results\*

### DenTASTIC All-Purpose Dental Adhesive System

#### 4th Generation Dual Cure

DenTASTIC? is a reliable and easy to understand system for bonding to all tooth and restorative materials. The system has both light cure and dual cure capability. The hydrophilic adhesive primers (A, B & C) and the unfilled resin bonding agents (1 & 2) are offered as separate components. There is a unique metal primer (C), and the light cure

resin bonding agent Part 1 can also be used to wet plastic instruments to prevent them from sticking to composites.

### OPTIBOND- KEER

OPTIBOND- KEER

\* OptiBond? Solo Plus is a single-component dental adhesive designed for both direct and indirect bonding applications. It is 15% filled with the same 0.4 micron filler found in the Kerr Point 4 composite. The filler not only reinforces the hybrid zone but also penetrates the dentin tubules, creating a true "structured bond" not found in unfilled or even "nano" filled dental adhesive systems. This unique dental bonding technology provides the highest level of protection against microleakage, while sustaining high bond strengths to a variety of surfaces.

\* OptiBond? All-In-One simplifies the restorative procedure by providing superior adhesion to all surfaces and substrates for both direct and indirect applications - even indirect metal-based restorations when used with NX3 resin cement.

**AVAILABLE: 5 ml- 6 ml- 10 ml**
