FLEXIPALETTE - SMILE LINE

FLEXIPALETTE - SMILE LINE

Features:

- * Contractors for intra-oral photography.
- * Facilitates the acquisition of complete black backgrounds when taking pictures.
- * Minimum quantities are required.
- * Can be sterilized in autoclave at 135 °C
- * Absolutely opaque and reflection free.
- * Soft surface that avoids any unpleasant contact in the mouth.
- * Can be bended to a 30°-45° angle for more ergonomomy
- * Resistant to alcohols, phenols, glut aldehyde, their mixtures and other

mercury free disinfectants.

Advantage:

- * Their ergonomic shape allows an easy handling for the photographer as well as for the patients? self-positioning.
- * Flexipalette are made out of a copper sheet completely covered by a medical grade plastic rubber, latex-free, hypoallergenic and suitable for intraoral use.

SMILE CAPTURE 2016 - SMILE LINE SMILE LINE - SMILE CAPTURE 2016 DENTAL PHOTOGRAPHY BECOMES A SNAP

Instant image transfer, sharing of information on social networks... today this has become a habit for most of us. With no doubt the major argument for an optimized communication between the dentist and lab.

Smile Capture is a set of accessories that allows you **to take professional and high quality pictures** and videos **with your smartphone (iPhone or Samsung) and the Smile Lite.**

A choice of 10 adaptors (to be ordered separately) allowing to connect the Smile Lite and the smartphones completes this system, simple and easy, yet very performant.

Very important, **an App (download for free on AppStore or PlayStore)** was developed as a full part of Smile Capture.
