Light Cure Composite - SHOFU

SHOFU - BEAUTIFIL II Composite
Light Cure Nano Hybrid Composite

Feature BEAUTIFIL II Composite

Composite with Fluoride - Release and Recharge

* BEAUTIFIL II is an universal nano-hybrid composite incorporating S-PRG (surface pre reacted glass ionomer) technology that contains a stable phase of glass-ionomer for aesthetic and long-lasting restorations that release and recharge fluoride.

* BEAUTIFIL II responds to the concentration of fluoride in the mouth while maintaining the strength and stability of a composite resin. In JADA, a major clinical study was published citing no secondary caries after 8 years, and 95% of luster was retained¹.

* B BEAUTIFIL II Composite In a follow up clinical study (to be published), after 13 years secondary caries were only found in 2 of the 61 restorations, with a retention rate of 66%², making it a great choice for pediatric care and high-caries risk patients.

* BEAUTIFIL II Composite In addition to the S-PRG fillers, discrete nano fillers (10~20nm) have been included in the filler structure to obtain a filler load of 83.3 wt% for fast and easy polishing with an outstanding surface luster which retains over time.

A fluoride releasing, highly aesthetic dental material for all classes of restorations.

Eight-year University of Florida clinical study published in JADA showed no secondary caries, no failures, no post-operative sensitivity and high retention of color match and luster. S-PRG (Surface Pre-reacted Glass Ionomer) technology - ability to recharge fluoride. Appropriate for patients with a high caries index. Excellent fluorescence and light diversifying aesthetics. Eliminates shade variations associated with polymerization. High level of radiopacity. Enamel-like surface hardness.

S-prg Technology BEAUTIFIL II Composite

* Beautifil- II Superior handling

* BEAUTIFIL II High level of radiopacity

* BEAUTIFIL II Desired properties of glass-ionomers

- * Fluoride release and recharge
- * Biocompatibility/re-mineralization
- * Long term clinical stability
- * Shade conformity (optical property)
- * Aesthetics close to natural teeth
- * BEAUTIFIL II Resistance to wear of posterior teeth
- * BEAUTIFIL II Anti-plaque effect

Physical Properties:

- * BEAUTIFIL II Flexural Strength: 130 Mpa
- * BEAUTIFIL II Vickers Hardness: 62 Hv
- * Wear Resistance: 0.52 wt%
- * Filler Load: 83.3 wt%
- * Depth of Cure: 5.9 mm
- * Radiopacity: 3.4 Al : mm
- * Fluoride Release & Recharge: Yes

BEAUTIFIL II

BEAUTIFIL II - AESTHETIC MATERIAL - SHOFU

A fluoride releasing, highly aesthetic dental material for all classes of restorations. Eight-year University of Florida clinical study published in JADA showed no secondary caries, no failures, no post-operative sensitivity and high retention of color match and luster

Beautiful Composite Restorative is a Giomer product containing PRG technology.

This is a proprietary process, exclusive to Shofu, which allows the combination of conventional composite and glass technologies to create a superior product with excellent physical properties and the ability to release and recharge fluoride.

Features:

- * Appropriate for patients with a high caries index
- * Excellent fluorescence and light diversifying aesthetics
- * Eliminates shade variations associated with polymerization
- * High level of radiopacity
- * Enamel-like surface hardness

Us Dental Depot is an Authorized SHOFU Dealer in US.

Beautiful II GINGIVA

BEAUTIFIL II GINGIVA REFILL - SHOFU

Features:

Beautiful II Gingiva direct resin composites were developed as an addition to the award-winning Beautiful II, a fluoride-releasing, bioactive, nano-hybrid composite in dentin shades. Beautiful II Gingiva shades are intended for the cervical area, specifically?the aesthetic correction of gingival recession, wedge-shaped defects, exposed cervical areas, splinting, and re-balancing of pink aesthetics. The pink-colored Beautiful II Gingiva was created based on Shofu?s signature Ceramage line, a nano-ceramic indirect composite, designed for artistic restorations of anterior regions. Similarly to its indirect predecessor, Beautiful II Gingiva resin composite can be blended together and layered to produce custom shades that will help effectively address patient?s clinical needs.

- * Aesthetic gingiva reproduction?recession, exposed abutments and PFM crown margins, root erosion and lost papilla
- * Shades are designed to meet the needs of all ethnicities
- * Aesthetic solutions without surgery
- * Perfect for Class V restorations

BEAUTIFIL FLOW

BEAUTIFIL FLOW - SHOFU

- * Beautifil Flow is a radiopaque light-cure flowable restorative material for esthetic restorations.
- * Beautifil Flow is available in the two distinctive viscosities F02 (low flow) and F10 (high flow), its shades harmonise perfectly with Beautifil.
- * A syringe specially developed for the dentist's needs assures the simple and hygienic application of the material without oozing of excess paste.
- * Both versions of Beautifil Flow are available in seven shades based on the Vita* Classical Shade Guide.

Indication

- * Small, shallow cavity restorations (class I to III and class V cavities)
- * Deciduous restorations
- * Base / liner under restorations
- * Fissure sealant
- * Undercut blockout
- * Restorations of fractured porcelain and composites

Benefits

- * High water repellence and long-term stability
- * Remarkable radiopacity/fluoride release and recharge
- * Natural light diffusion
- * Innovative design of syringe with 360° rotary finger grip

Material properties

- Contains S-PRG filler created by using the PRG technology (Pre-Reacted Glass Ionomer). It is one of the products of "Giomer", a product category that hybridized the advantages of glass ionomer and composite resin.
- F10 is available in the shades A1, A2, A3, A3.5, A4, A3O (opacious A3), A3T (A3 translucent).
- F02 is available in the shades A1, A2, A3, A3.5, A4, A3O (opacious A3), G (Gum)

US DENTAL DEPOT Inc is an Authorized SHOFU Dealer in the US.

FIT SA | SELF ADHESIVE FLOW

SHOFU - FIT SA KIDS - 2.2gr - SELF ADHESIVE - NANO-HYBRID FLOWABLE COMPOSITE with GIOMER Technology Inside Available F03 Low Flow & F10 High Flow

FIT SA

Simplify procedures with FIT SA, a comprehensive self-adhesive flowable restorative with bioactive Giomer Technology* inside. FIT SA KIDS - has eliminated the need for the technique sensitive bonding procedure. FIT SA KIDS - offers superior strength and polishability, and the unique filler structure combines the light transmission and diffusion properties of enamel and dentin to blend well with the surrounding dentition.

PROLINE - Micro-Hybrid Light Cure Composite B2 Syr/4.5 Gr

Light Cure Hybrid

115944 - Mfg # 001-401A1

Feature:

PROLINE Micro-Hybrid A Light cured resin based composite used for all types of cavity preparations. An ideal choice for both anterior and posterior applications. Easy to mold, sculpt, and polish to a high luster. Has high compressive strength as well as low shrinkage and resists staining. Radiopaque for easy identifications in radiographs.

PROLINE Micro-Hybrid All purpose radiopaque, highly publishable, with 76% filled Micro-Hybrid Composite plus an average filler particle size of less than .7 microns makes PROLINE Micro-Hybrid ideally suited for anterior and posterior restoratives.

FLOWS-RITE COMPOSITE - PULPDENT

PULPDENT - FLOWS-RITE

Light Cure - Fluoride Releasing Radiopaque

Flows-Rite is a micro-hybrid restorative resin formulated with the flow characteristics preferred by dentists. In addition to the most popular shades, it has a unique chameleon shade, ShadeFusion?, that blends and reflects adjacent hues to create a natural esthetic. ShadeFusion is ideal for blending multiple shade restorations, incisal repairs, bleached teeth and veneer cementation.

Ideally suited for the following indications:

- Esthetic Restorative
- Veneer Cement
- Fissure Sealant
- Base/Liner
- Cervical Repairs
- Preventive Resin Restorations(PRR)

With the features you prefer:

- Excellent esthetics and polishability
- Preferred viscosity and handling characteristics
- 68% filled
- Nominal particle size: 0.7 microns
- Available shades: A1, A2, A3, A3.5, B2, C2, ShadeFusion?

Opaquer Composite

ESTHETIC OPAQUERS - PULPDENT

ESTHETIC OPAQUERS - PULPDENT

Features:

20-Second Light Cure. For masking out metals and discolored tooth surfaces

Spreads smoothly and easily to a thin film

A palette of five opaquer shades for esthetic dentistry that can be mixed together to produce a wide range of color variations. A thin film masks out metals and discolored tooth surfaces and light cures in 20 seconds. The material spreads quickly and easily with a brush and cures with all lights.

Embrace Opaquers enjoy all the advantages of Embrace resin technology and behave favorably in the moist oral environment.

Available in Five Popular Esthetic Shades: Bleach White, Off-White, Light Yellow, Pink, Dark Yellow.

G-COAT

G-COAT PLUS(TM) Nanofilled Self-Adhesive, Light-Cured Protective Coating G-COAT PLUS(TM) is the only light-cured, protective clear coating formulated with adhesive monomer and nanofillers. One thin coat protects margins, prevents staining and provides a high gloss (comparable to intense polishing).

G-COAT PLUS(TM) restores aesthetic appearances and marginal integrity when used to repair the interface between restorations and marginal tooth structure. Its exclusive adhesive monomer results in superior adhesion to enamel, dentin, composite, glass ionomer, and resin modified glass ionomer.

OPTIGLAZE

[GC - Optiglaze Light-Cure Glaze for composite and acrylic indirect restorations](#)

Acrylic Glaze and Sealants

OPTIGLAZE COLOR

OPTIGLAZE Color is a light-cured characterization coating for composite and acrylic indirect restorations.

- Used to stain and glaze your composite acrylic and PMMA type materials
 - Quickly change shades, shift value, characterize, create effects and glaze all your resin type prosthetics
 - Nano-filler technology gives your restoration a high-wear resistance

OPTIGLAZE Color is a revolutionary new material developed specifically to stain and glaze your composite, acrylic and PMMA type materials. You can now change shades, shift value, characterize, create effects and glaze all your resin type prosthetics in no time at all. Best of all, offer your dentists and patients a more beautiful and esthetic restoration that will last due to GC's innovative new homogeneously dispersed nano-filler technology.

The versatility of OPTIGLAZE Color will impress you because it adds color, surface gloss and high wear resistance to all your artificial teeth, acrylic dentures, hybrid ceramic crowns, implant retained dentures, composite crowns and bridge, temporary resin crowns and bridges and acrylic permanently fixed with implants.

Features OPTIGLAZE Color
Light-Cured Nano-Filled Glaze coating

Simplifies the finishing process by providing an aesthetic glossy surface on artificial teeth, removable dentures, temporary crowns and individual acrylic trays. GC OPTIGLAZE Color is the solution for difficult to polish areas such as posterior fissures or interproximal areas of indirect composite restorations. So, instead of mechanical polishing, take the easier option and get a higher quality final gloss with OPTIGLAZE Color.

- * High wear and discoloration resistance
- * Superior bonding durability
- * Long lasting gloss.

PIT & FISSURE SEALANT - PRO-LINE

PIT & FISSURE SEALANT - PRO-LINE

Bis-GMA based filled sealant resin is formulated specially for the sealing of small pits and fissures.

The flowable sealants have excellent penetration into tight adaptations with high bond strength to the enamel for high wear resistance
Contains fluoride for effective cavity protection.

Available: A2- Clear

Composites

Self Cure Composites

SELF CURE CHEMICAL COMPOSITE KITS - PROLINE

SELF CURE CHEMICAL COMPOSITE KITS - PROLINE

Self-Cure is a highly filled, non-sticky, self-curing, hybrid, anterior/posterior composite filling material.

It is a convenient universal shade, paste/paste system. The restorative has high strength (2 i 3 MPA compressive) with low water sorption and solubility.

No Led Light Needed Universal Color

Description:

* The material can be condensed into the cavity preparation up to the enamel-dentinal joint as a base layer or may be filled to the cavo-surface margin for a complete self cure composite restoration.

* Quick setting eliminates time spent with incremental placement of light cure materials
