HARDCORE FORMS - PULPDENT

HARDCORE FORMS - PULPDENT

Features:

These transparent core forms have a tab on the top so you can easily pick them up with a cotton pliers or hemostat. The reference line around the middle helps with accurate contouring. The tapered sides are for precise sizing and fast removal. They are made of clear polyethylene for light curing and easy trimming with scissors, and they will not stick to core material.

- * Transparent core forms for fast light curing
- * Tab on the top for easy pick up with cotton pliers
- * Reference ring for accurate trimming and contouring.
- * Tapered sides for precise sizing and fast removal
- * Clear polyethylene does not stick to core material

COMPCORE - PREMIER

COMPCORE - PREMIER

* Dual-cured, fluoride-releasing, radiopaque composite core build-up material for use in vital and non-vital teeth.

* The material uses hyperbranched technology, which ensures a more complete cure. The product is available in three shades (white, A3, and blue) and refrigeration is recommended for maximum shelf life.

* The kit evaluated includes two, 9-g syringes; 15 mixing tips; 15 standard intraoral tips; and 10 extra-fine intraoral tips.

* Provides a consistent mixture of core build-up material that dispenses easily and stacks well.
