Absorbent Paper Points

Absorbent Paper Points - META BIOMED

PAPER POINTS - META BIOMED

Paper Points are rolled to exact specifications and provide excellent absorbency for your root canal preparation.

Variously sized tapers are color-coded for easy ID and will fit perfectly into Greater Taper preparations

Made in Korea by MetaBiomed

FDA approved

Best seller in the US 2009/10

ENDO DTC ENDODONTIC MOTOR - ASEPTICO

ENDO DTC ENDODONTIC MOTOR - ASEPTICO

The Endo DTC Electronic Endodontic System is a highly advanced endo unit featuring five fully programmable memory locations to help automate your operating procedure. With this endo motor, saving your customized settings is simple using the front panel controls.

Our Auto-Stop-Reverse feature automatically reverses the direction of file rotation when a defined torque level is reached, reducing the occurrence of file breakage while decreasing procedure time. The Endo DTC also features an integrated calibration system to give the highest measure of accuracy and consistent operation among endo motors.

Gate Burs

GATES GLIDDEN - HOUSE BRAND

GATES GLIDDEN DRILLS - HOUSE BRAND

Gates Glidden Drills are flame-shaped with a boring head on a slender shaft for fast cutting. Safety tip guards against perforation. Used to remove curvatures of the orifice for: Greater access to the canal for enlarging instruments and filling materials, Opens the orifice, Preparing tooth for post.

(The Shark - Gates Glidden are Only for Export)

Endodontics

NITI ENGINE Files

ENGINE FILES NITI - M-3

ENDO NITI ENGINE M-3 - SHARK

- * Each file has its own specific work area
- * Convex triangular cross-section, providing high cutting efficiency whether machine or hand used
- * Design of the pluralism and spiral groove angle to minimize embedding into the root canal wall in the rotation process
- * Improved design of the tip is gentle so that to avoid damage to the root canal wall
- * Materials: niti

ENGINE ROTARY FILES - GENERAL

K-FILES

NITI ENGINE K FILES - ECCO

Features:

- * For preparation of severely curved and narrow root Canals with a filing motion
- * NiTi, improved handle
- * Triangular cross-section for highest cutting efficiency.
- * More cutting edges than flexicut reamers.
- * Cutting angle effective with filing motion
- * Taper /02 provide high stability and flexibility in severely curved and narrow root canals
- * Special steel alloy with uniform structure for maximum resistance to fracture and maximum flexibility
- * The inactive tip conducts the instrument safely along the canal
- * Recommended speed 280-300rpm
- * Box of 6 pieces

NITI TAPERED ENGINE FILES

Feature

- * For preparation of severely curved and narrow root Canals with a filing motion
- * NiTi, improved handle
- * Triangular cross-section for highest cutting efficiency.
- * More cutting edges than flexicut reamers.
- * Cutting angle effective with fi ling motion
- * Taper /02 provide high stability and flexibility in severely curved and narrow root canals
- * Special steel allow with uniform structure for maximum resistance to fracture and maximum flexibility
- * he inactive tip conducts the instrument safety along the canal
- * Recommended speed 280-300rpm
- * Box of 6 pieces

PROTAPER NITI

NITI PRO-TAPER ENGINE FILES

For Endomotors & Machanic Treatment

- * Revolution design with progressive taper
- * For preparation of severely curved and narrow root Canals with a filing motion- NiTi, improved Handle- Taper 0.2-08 progressively
- * Triangular cross-section for highest cutting efficiency. More cutting edges than flexicut reamers.
- * Cutting angle effective with fi ling motion
- * Specials steel alloy with uniform structure for maximum resistance to fracture and maximum flexibility
- * The inactive tip conducts the instrument safely along the canal
- * Recommended speed 280-300 rpm
- * Box of 6 pieces

PROTAPER NITI GOLD TYPE

PRO TAPERED GOLD TYPE

ProTaper Gold files visibly advanced metallurgy creates a difference you can see ? and feel. That?s because ProTaper Gold rotary files feature the identical geometries as ProTaper Universal but offer an increase in flexibility. This is especially important in the finishing files, when navigating challenging curves in the apical region. The ProTaper Gold technology includes a series of ?Shaping? and ?Finishing? files that create the predictable ProTaper shape and a system proven by science and trusted by clinicians throughout the world. ProTaper Gold Shaping Files are designed to be used with the same familiar brushing technique as ProTaper Universal shaping files. ProTaper Gold Finishing Files are more flexible to the finish so you can shape and finish each canal with a complete system approach.

GUTTA PERCHA CUTTER - SHARK

GUTTA PERCHA CUTTER - SHARK

- * Convenient design and beautiful shape
- * Using wireless charging technology, stylish and fashionable
- * Fast heating and maximum temperature up to 260 ?
- * 2400mAh large capacity nickel cadmium rechargeable battery
- * Avoid frequently charging trouble
- * Fever needle can be sterilized by high temperature and high pressure, repeated use highest temperature of 135? C
