RELYX FIBER POST REFILL - ESPE

RELYX FIBER POST REFILL - ESPE

Elasticity of RelyX Fiber Post is similar to human dentin for a lower risk of root fracture due to the wedge effect.

Unique resin composition and equally dispersed parallel fibers lead to superior mechanical strength.

Microporous surface allows for additional bond strength through microretentive effects.

Excellent light translucency for efficient light cure deep into the root canal.

Improved radiopacity is among the highest of available glass fiber posts.

RelyX? Unicem system makes cementing a post fast, easy and reliable

Available Size: 1- 2

GLASS FIBER POST - VIVA

FIBER POSTS ? VIVA

VIVA PLUS: Conical posts

VIVA ELITE : Threaded & Conical

10 fiber posts per box

4 Fiber posts sizes available

Available Sizes:

- Glass fiber Post - 1.00mm
- Glass fiber Post - 1.20mm
- Glass fiber Post - 1.40mm
- Glass fiber Post - 1.60mm

Radiopaque

Manufactured with a unique process that pre-stresses the fibres, which lead to optimal mechanical properties.

The high density of the unit-directional glass fibres provides excellent strength and flexibility for a restoration that mimics the stress distributions of healthy teeth, thereby preventing fissures or fractures.
