Impression Materials

Alginates

ALGINATES - ZHERMACK

ZHERMACK - ALGINATES

High quality alginates impression material for dental use.

All Zhermack's alginates are highly thixotropic and extreme fluidity during the taking of impression and their excellent compatibility with all stones for dental use.

Each alginate is designed to meet the diverse needs of professionals; special

formulations are designed to balance strength, flexibility, precision and dimensional stability, making each product specifically design for unique clinical applications.

Due to the full control of the production line cycle, all the Zhermack's alginate can boast a very high quality standards while offer 5 years storage guarantee from date of production.

FREEALGIN - ZHERMACK

FREEALGIN - ZHERMACK

Use:

- * Impressions for temporary crowns and bridges directly in the surgery
- * Impressions for orthodontics
- * For removable prostheses or for modifying a removable prostheses
- * Suitable for preliminary impressions, for antagonist models and surgery impressions
- * For bites, surgical guides and masks for whitening solutions
- * Recommended for Monophase technique with one viscosity

Advantages:

- * Ideal consistency for creating temporary crowns and bridge impressions, and then used with Zhermacks Acrytemp temporary material
- * Excellent elastic recovery, fast setting for orthodontics
- * High tear resistance
- * High dimensional stability, no time limit for applying adhesive to the impression
- * Excellent results even in humid field thanks to a high hydrophilic behaviour
- * Possible to obtain several models from the same impression
- * Possible to pour the model immediately after disinfection
- * Safe disinfection with Zeta 7 Solution and Zeta 7 Spray
- * 3 year shelf life

Impresion Materials

Bite Registration Material

BITE REGISTRATION MATERIAL - DEFEND

BITE REGISTRATION MATERIAL - DEFEND

BITE REGISTRATION MATERIAL

Mousse-like and Thixotropic, fluffy vinyl polysiloxane material. Used for bite registration, copying transfers, and primary impression with bite trays. Thixotropic material has an excellent durometer of over 80 and flows easily, yet will not run or sag. Our "Hard" Bite material #9010 can be used in conjunction with all "laser" CAD/CAM systems.

DEFEND CADBITE

Polyvinylsiloxane impression material for use in the fabrication of CAD/CAM restorations. This highly-effective conventional bite registration material is also scannable.

DEFEND CLEARBITE

Great visibility for voids or bubbles makes Clear Bite an excellent choice as a matrix for quick and easy self-cure temporary materials. Light-cure through the clear material for dual cure or light-cured temporary materials. Unflavored.

ACCUDOSE TUBES - CENTRIX

ACCUDOSE TUBES - CENTRIX

Features:

Accudose is a series of tubes and plugs that effectively dispense any type of composite or cement while reducing voids and porosities in any restoration. They are also disposable, eliminating cleanup and risk of cross contamination.

- * PhotoBloc orange tint, blocks light and extends the life of light-activated materials
- * Easy to load
- * Can be used with all syringes currently on the market
- * Available in variety of styles for specific applications

Silicone & Alginate Mixers

ALGINATE MIX - ALGHAMIX II - ZHERMACK

ALGHAMIX II - ALGUINATE MIXERS - ZHERMACK

Applications:

* Alghamix II allows for the mechanical mixing of alginates, plasters and silicones for dental use

Characteristics:

- * 2 speed rotation
- * Ergonomic speed selector
- * Bayonet bowl-fastener

Available bowls:

small 350 cc for alginate, large 600 cc for plaster

Available bowl colours:

grey, orange, green, light blue, navy blue, White

* Plate with 20-sheet mixing block for silicones

* ABS body

* 115V10% / 50-60 Hz - 50 Wat

DOUBLEMIX - ZHERMACK

ZHERMACK - DOUBLEMIX 115 VOLTS

Automatic mixer for duplication A-Silicones

Applications

* Automatically mixes the liquid silicones (A-SILICONE) used for duplicating models in laboratories

Advantages

- * Use of Doublemix in combination with elite double extra fast allows for model duplications in little more than 6? minutes
- * Thanks to its state of the art dosing pump, doublemix guarantees a drip-free, bubble-free surface allowing for repeated duplications unlike manual mixing machines
- * The adjustable disk allows you to align the flow, and facilitates insertion of the mixing tip
- * The aluminium support helps position the flask correctly on the work surface
- * The quick insertion system and flow shut-off valves prevent the formation of air bubbles during liquid delivery
- * Adjustable bracket design is compatible with all of Zhermack s duplication silicone pack sizes
- * The start button is specially positioned to facilitate filling the flask
- * 2 year warranty

ELITE HD+ IMPRESION MATERIAL SILICON E VPS - ZHERMACK

ELITE HD+ IMPRESION MATERIAL SILICONE VPS - ZHERMACK

Description:

Hydrophilic very low viscosity A-silicone (Addition) for fixed prostheses. Suggested techniques: two stage. Light consistency

Advantages:

- * Maximum precision in detail reproduction
- * High tear strength
- * Excellent elastic recovery
- * High dimensional stability
- * Opaque pigments for improved detail Reading
- * Possible of casting the model immediately after disinfection
- * 3-year shelf life
- * Safe disinfection with Zeta 7 Solution and Zeta 7 Spray

Characteristics:

- * Mixing ratio 1:1
- * Hydrophilic
- * Thixotropic
- * Ideal working time/setting time ratio (Snap-set effect):
- * Long working time
- * Shorter permanence in the oral cavity
- * Biocompatible
- * Green colour

Working time:

- * Reg Set: 2 minutes
- * Fast set: 1.5 min

Setting time:

- * Reg Set: 5min 30 sec
- * Fast Set: 4 min

VPS IMPRESSION MATERIAL - DEFEND

VPS IMPRESSION MATERIAL - DEFEND

VPS (Vinyl-Poly-Siloxane) impression material formulated with Nanotechnology: The presence of the nanostructure increases the fluidity of the material, particularly when pressure is applied.- High deformation strength

High performance (H.P) cartridge system available in regular and fast set. All viscosities are available. Excellent tear strength to maintain impression integrity upon removal and precise impressions no matter what technique you use.

There are available in Regular and Fast Set

These Items do not include Tips. We recommend the Yellow tips for these products

SPEEDEX - COLTENE WHALEDENT

SPEEDEX - COLTENE WHALEDENT

Features:

- * Speedex medium has outstanding wettability and excellent flow characteristics
- * Saliva and blood are displaced by Speedex medium and have no negative side effects
- * With the variable setting time of Speedex medium the important mucosal movements, which are necessary for the full and partial denture technique, can be taken very precisely
- * A perfect impression is the key for an accurate fitting denture

Note: Delivery in 15 days

Zinc Oxide Paste

SUPERPASTE - BOSWORTH

SUPERPASTE - BOSWORTH Keystone

Superpaste is a heavy body zinc oxide eugenol impression paste used for taking soft tissue impressions and final impressions with a denture. Superpaste combines the essentials of controlled flowability and "no sag" body to give unexcelled reproduction of the basal tissues. Its non-sticky formula sets hard in approximately 2 minutes to prevent bending or distortion and has no taste or burning sensation for patient comfort.

Tips: Superpaste is an good alternative for taking fully extended peripheral impressions on persons with a sensitivity to acrylics.
