ACCUDOSE TUBES - CENTRIX

Features:

Accudose is a series of tubes and plugs that effectively dispense any type of composite or cement while reducing voids and porosities in any restoration. They are also disposable, eliminating cleanup and risk of cross contamination.

- * PhotoBloc orange tint, blocks light and extends the life of light-activated materials
- * Easy to load
- * Can be used with all syringes currently on the market
- * Available in variety of styles for specific applications

Modulmix

MODULMIX - ZHERMACK

Advantages:

With respect to manual mixers, the Zhermack system automatic mixing is easy, constant and offers higher quality
 With modulmix, the mixing phase is notably reduced to give more product working time

Modularity:

The possibility to connect numerous machines in-line allows for the use of numerous materials simultaneously (heavy body - alginate replacement)
 Two dispensing speeds, fast for filling the tray, normal for filling a syringe
 Compact and linear design which guarantees reduced encumbrance upon working surfaces
 Transparent plastic cover allows for immediate viewing of both the material being used as well as the level of material remaining in the cartridge
 Two dispensing buttons located on either side of the Modulmix, for left & right handed operators.

ZINC OXIDE PASTE

SUPERPASTE - BOSWORTH

SUPERPASTE - BOSWORTH Keystone

Superpaste is a heavy body zinc oxide eugenol impression paste used for taking soft tissue impressions and final impressions with a denture. Superpaste combines the essentials of controlled flowability and "no sag" body to give unexcelled reproduction of the basal tissues. Its non-sticky formula sets hard in approximately 2 minutes to prevent bending or distortion and has no taste or burning sensation for patient comfort.

Tips: Superpaste is an good alternative for taking fully extended peripheral impressions on persons with a sensitivity to acrylics.
