GRACEY CURETTE - TITANIUM COATED - SHARK
GRACEY CURETTE - TITANIUM COATED - SHARK

Feature:

Periodontal (gum) instruments are used in various gingivitis and periodontitis. There is a wide range of range of single and double end instruments provide by US Dental Depot.

Double ended instruments allow the clinician to simply flip the instrument to use the other working-end.

DOUBLE GRACEY - AMERICAN EAGLE DOUBLE GRACEY - AMERICAN EAGLE

Double Gracey instruments, the latest innovation from American Eagle Instruments, are a line of instruments that combine two instruments in one. This allows the operator to follow the Gracey technique, but with the economy of using universal curettes. The face of Double Gracey? instruments are raised, thus creating two slightly sloped faces, approximately 110 degrees, measured from the terminal (lower) shank.

Double Gracey Technology Benefits

- * Allows the clinician to stay in one ergonomic position during scaling without shifting positions
- * Allows clinician to keep lower shank parallel to tooth surface (axis), similar to traditional Gracey instrumentation
- * Maneuver between mesial and distal surfaces without switching or flipping instruments
- * Enables clinician to scale from light to heavy calculus
- * Rounded toe provides safe access for subgingival scaling

GRACEY CURETTE RIGID - AMERICAN EAGLE

GRACEY CURETTE RIGID - AMERICAN EAGLE

Features:

Gracey Curettes are designed to adapt to specific anatomical areas of the teeth for subgingival scaling and root planing.

The blade angle allows easier insertion into the sulcus while minimizing soft tissue trauma.

Available with stainless steel or color resin handles.

Anterior/ Slight contra-angle for incisors and canines.

BLACKJACK SCALER - AMERICAN EAGLE BLACKJACK SCALER - AMERICAN EAGLE

Designed with the hygienist in mind, the Blackjack has a favorable blade design ideal for removing calculus and stains in all anterior and interproximal areas, as well as access throughout the posterior. American Eagle Instruments added 4mm to the shank to increase posterior access over other universal sickle scalers.

In addition to stainless steel tips, the Blackjack is also manufactured with AEI's patented sharpen-free XP Technology for a blade that maintains its factory edge throughout the life of the instrument. Blackjack is available in

EagleLite resin or stainless steel handles.

Plus, responding to repeated requests from dental hygienists throughout the world, American Eagle makes the Blackjack in Quik-Tip cone sockets in both Talon Tough stainless steel and sharpen-free XP Technology.

EAGLE CLAW & EAGLE TALON SCALERS - AMERICAN EAGLE

EAGLE CLAW & EAGLE TALON SCALERS - AMERICAN EAGLE

The **Eagle Claw** is designed with a thin finely-balanced contra-angled sickle scaler blade that easily adapts to posterior supragingival and interproximal areas.

The **Eagle Talon** complements the Claw by combining two popular anterior tips, the J3 (Jacquette) and the N128, into one innovative instrument. Its thinly-tipped sickle scaler is ideal for removing calculus and stains in all anterior interproximal areas.

N SERIES SCALERS - AMERICAN EAGLE

N SERIES SCALERS - AMERICAN EAGLE

These scalers are designed for the hygienist who needs speed and perfection in those difficult anterior areas. The spoon is ideal for maxillary anterior cingulums with very difficult stain and calculus. It easily removes lower anterior lingual layers of calculus without the worry of snagging the thin lingual tissue. AEI's patented sharpen-free XP Technology maintains the factory shape throughout the life of the instrument

CURETTE COLUMBIA - AMERICAN EAGLE

CURETTE COLUMBIA - AMERICAN EAGLE

Features:

Universal Curettes are used for scaling and root planing. XP Technology is a patented surface engineering process that creates a more durable material, enabling these instruments to have a sharper edge with a thinner blade.

- * Lasts months without sharpening
- * Sharper factory edge
- * Thinner blade design
- * Faster, easier procedures
- * Available with stainless steel or color resin handles.

Shorter, more curved and slightly broader blade than Barnhart 5-6; adapts to concavities of roots in shallow pockets. Rounded toe used to remove lingual anterior stains.

This instrument is surface engineered with our patented sharpen free XP Technology
