Instruments Surgical  
Needle Holders

**NEEDLE HOLDER - ECCO**

**NEEDLE HOLDER - ECCO**

**Features**

- \* Ergonomically designed
- \* Precise machine work for shape, thickness and balance
- \* Precision designed for correct application use and balanced performance
- \* Made with Highest quality medical grade materials
- \* More durable, lasts longer
- \* Sterilizable

The **ADSON Needle Holder** is a surgical instrument, similar to a hemostat, used by doctors and surgeons to hold a suturing needle for closing wounds during suturing and surgical procedures.

The **ADSON Needle Holders** have a clamp mechanism that locks the needle in place, allowing the user to maneuver the needle through various tissues. To maintain a firm grip on the needle, the jaws are textured and short compared to the handles (increasing the applied force following the principle of a lever). **CASTROVIEJO Needle Holders** have a clamp mechanism that locks the needle in place, allowing the user to maneuver the needle through various tissues. To maintain a firm grip on the needle, the jaws are textured and short compared to the handles (increasing the applied force following the principle of a lever).

The **ADSON Needle Holder** is a surgical instrument, similar to a hemostat, used by doctors and surgeons to hold a suturing needle for closing wounds during suturing and surgical procedures.

**MAYO-HEGAR Needle Holders** have a clamp mechanism that locks the needle in place, allowing the user to maneuver the needle through various tissues. To maintain a firm grip on the needle, the jaws are textured and short compared to the handles (increasing the applied force following the principle of a lever).
