### Soft Acrylic Reliners

#### LANG - Flexacryl Clear Soft Professional

#### Chair Side Reliners

# 115104 - Mfg #1123FIB

#### Features:

Lang Dental knows how important it is to maintain a level of commitment to your patients. Denture Reline can increase the longevity of denture retention and eliminate the need for new dentures. If a patient has ineffective dentures, his/her quality of life is diminished. We offer a variety of successful Denture Reline products to suit your patient's needs, and to guarantee quick, accurate results every time.

Soft chair sides reline acrylic resin. 30 minutes the complete process

#### Powder: Fibred Pink,

Professional Package (100g powder / 118ml liquid + 10 ml Acrylic primer )

#### Benefits:

- \* Similar to Flexacryl Hard - Delivers a firm, but resilient, fit
- \* Highly comfortable - Generates a soft, durable reline the patient will appreciate
- \* Longevity - Remains resilient for up to 12 months due to plasticization

### COE-SOFT

**COE-SOFT** Soft Denture Reline Material **Product Information** COE-SOFT is a resilient, self-curing reline material that is used when the patient requires a soft, temporary liner in upper or lower dentures. COE-SOFT polymerizes in or out of the mouth in approximately 15 minutes. The reline will normally last for approximately 3 months.

#### Why choose COE-SOFT?

- No monomers - no exothermic heat or burning sensation - no unpleasant taste or odor
  - Soft lining provides greater patient comfort
  - Contains zinc undecylenate which is ideal for post-surgical applications; placement of immediate denture
  - Mixes in 30 seconds with about 32 applications per package

**TRUSOFT**

**TRUSOFT - BOSWORTH / Keystone**

Trusoft is a plasticized acrylic PEMA that is specifically designed as an intermediate liner for patients requiring a prolonged adjustment period prior to using a hard liner or denture base material (Softone is for shorter adjustment periods).

Its elasticity will ensure against pressure pain, tender ridges, sensitive areas, and irritated tuberosities. Trusoft is formulated to remain resilient for up to 30 days. Can be used for every patient as a precautionary measure but is especially necessary for patients who are slow to heal or sensitive to wearing a new denture. Patient is ready for a permanent reline (New or Original Truliner) when he or she can exhibit control and acceptance with Trusoft.

Mixing Ratio: 6.8 ml (glass vial) to 9 g (plastic vial) powder.

Tips: Trusoft can be used in between tissue treatments with Softone.

Recommended for use with: CoraCaine and Masque?
